

MASTERS OF ACCOUNTANCY

Mission Statement

To provide a high-quality, student-oriented, graduate accounting education by enhancing the graduate's ability to analyze and synthesize current and emerging issues facing the accounting profession. The program will enhance graduate's technical, analytical, research, and communication skills commensurate with the requirements of the profession.

Core courses provide advanced study of financial accounting, managerial accounting, auditing and assurance services, taxation, commercial law, and financial management.

Student Learning Outcomes

Graduates will be knowledgeable of the profession, critical thinkers, effective communicators, effective researchers, and ethical decision makers. After completing the master's program, the students will be able to do the following:

Content

- Apply advanced knowledge in the functional areas of accounting to inform and support decision-making
- Apply advanced information systems and controls techniques in organizational setting

Critical Thinking

- Analyze complex accounting issues

Communication

- Develop an effective, professional quality, written communication relating to an accounting issue or problem
- Deliver an effective, professional quality, oral presentation pertaining to an accounting issue or problem

Integrity/ Values

- Identify ethical issues and apply knowledge of professional codes of conduct or ethical decision models to reach conclusions

Assessment Methodology

A variety of direct assessment procedures are used in the program including the following: individual and group presentations; problems, essay and objective-based examinations; research and case analyses papers.

Alumni feedback surveys are used for indirect assessment measures.
