

## Cybersecurity, Undergraduate Certificate

### Mission Statement

This certificate program is designed for students in the B.S. Computer Science and B.S. Software Design & Development programs to gain experience and credentials in cybersecurity. By choosing appropriate electives, students majoring in Computer Science and Software Design & Development can earn this certificate while simultaneously completing the degree requirements for their respective programs.

### Student Learning Outcomes

**Critical Thinking:** Apply security criteria to requirements analysis, design, and implementation of software systems. Develop and implement testing strategies that uncover previously unknown vulnerabilities.
