

Creating a Podcast from an Elluminate Recording for Mac Users

This guide is intended to step the Mac users through the process of converting an Elluminate *Live!* recording into a Video Podcast. Mac users should use Snapz Pro X to create a MOV file. Then use QuickTime Pro to convert the QuickTime/MOV file into the video podcast format of MV4.

For more detailed steps on this process, please refer to **Podcasting with Elluminate Live! Recordings.**

The Steps:

1. Open Open **Snapz Pro** and click on **Movie**.

For more information visit: www.lluminate.com

2. Use the hot keys of **Command-Shift-3** to open the **Movie Settings** box. Use the following settings:
 - a. Selection style: Fixed Size and set the Width to 640 and the Height to 480.
 - b. Camera mode: fixed camera
 - c. Framerate: Select 1 for a simple presentation and 5 for a recording with live video and application sharing.
 - d. Select Mac audio track.

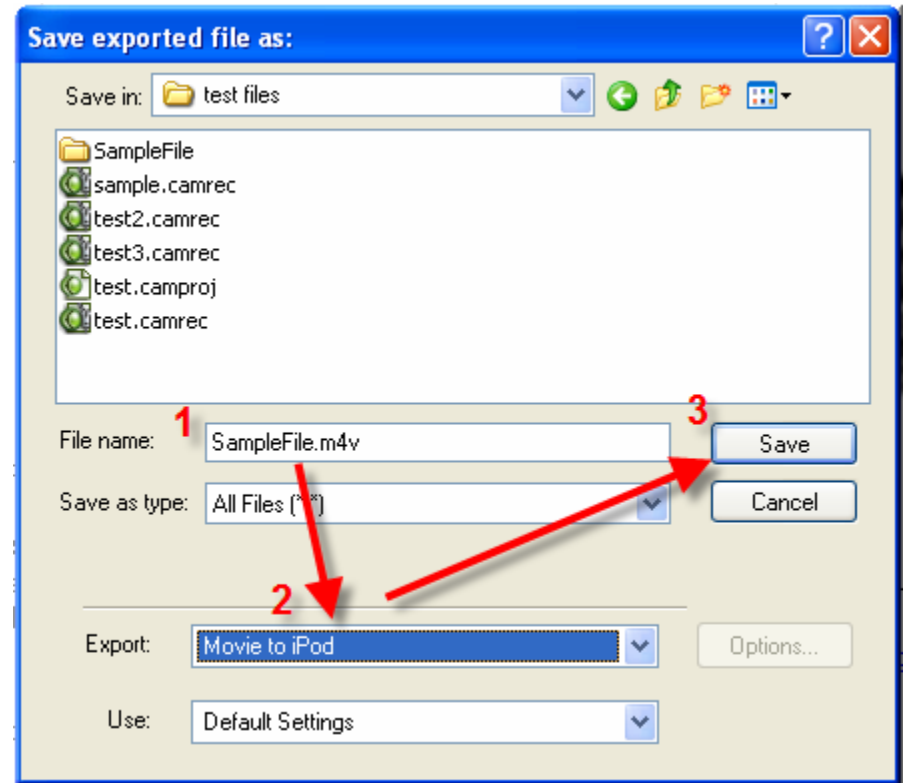

3. Record the Elluminate recording.
4. For **Movie saving settings**, select **Include video track** and **Include audio track** and **Save**.

5. Open the .mov file in **QuickTime Pro**.

6. Select **File > Export**.

7. Select **Movie to iPod** and **Save**.
