

Minor in Behavior Analysis

Mission Statement

The Minor in Behavior Analysis is designed for undergraduate students who wish to complete their degree in any field which may be enhanced by a solid understanding of human behavior. Graduates are positioned for careers in the healthcare industry, particularly in the treatment of autism spectrum disorders. The minor is intended for students interested in career advancement or for those whose goal is to work in the health professions providing service to individuals and communities. This minor may also be useful for students who are preparing for graduate studies across multiple disciplines.

Student Learning Outcomes

Content:

Identify and apply the concepts, principles, and theories that constitute behavior analysis.

Critical Thinking:

Apply appropriate methods to solve problems in behavior analysis.

Communication:

Employ effective and professional communication in behavior analysis.

Integrity/Values:

Identify and apply legal concepts, professional ethical principles, and regulatory requirements that apply to the field of behavior analysis.

Project Management:

Collaborate effectively with other professionals.
