

UWF STUDENT HEALTH SERVICES – 850-474-2172

Immunization Form & Process Fact Sheet

ONLY CURRENTLY ENROLLED UWF STUDENTS MAY USE THESE SERVICES

UWF STUDENT HEALTH SERVICES (SHS), located in Bldg 960, can assist you with your required immunizations as well as completion of your immunization form. In order to make this process more streamlined, SHS requires all nursing applicants to follow these guidelines, **NO EXCEPTIONS!** *Only currently enrolled UWF students may use our services.* We will NOT process paperwork for another university or nursing program.

The process works as follows:

- Each student must submit ALL of their immunization documentation, along with your UWF BSN Immunization Form, to SHS for a nurse to review. ***SHS cannot validate faxed or copied forms that leave off vital information such as a date or name of vaccine. It is your responsibility to provide decipherable documentation.***
- After the nurse reviews your information, one of our staff will call you to set up an appointment. (Please provide us with a working phone number)
- Appointments will be limited to one weekday and hours of availability may vary. Thus, it will benefit you to start this process as early as possible.
- SHS will establish a “cut-off” date 1 week prior to the deadline established by the nursing department whereby we will no longer process applicants.
- SHS will maintain custody of the immunization form until all documentation including (immunization dates/lab test results (titers) have been received/verified by a nurse and one of our providers has signed off on the form.
- There will be a **\$25 charge** for these services which is **separate** from the cost of immunizations and/or lab tests shown below.

Vaccine/Titer	Cost	Related Information
Hepatitis B Vaccine (Series of 3)	\$50/ea	Entire process takes 6 months (<i>series must at least be started before submitting nursing application</i>)
